## From Broad Estimates to Precision Mitigation:

Leveraging the 2019 IPCC Refinement to Accurately Reflect Climate and Management.

當「大概值」不夠好了：用2019 IPCC精進指南精算氣候與管理對排放的影響

Complex interactions between natural processes and human activities make estimating greenhouse gas emissions a significant challenge. In this seminar, I will discuss how these challenges are addressed in agricultural manure management and how practical methods are applied in Canada's national greenhouse gas inventory.

# From Broad Estimates to Precision Mitigation:

Leveraging the 2019 IPCC Refinement to Accurately Reflect  
Climate and Management.
